

TABLE OF CONTENTS

Introduction

Welcome and Course Introduction.....	I-1
Participation Guidelines.....	I-2
The Course Syllabus	I-2
An Introduction to SSPC’s Protective Coatings Inspector Training	I-3
Module One: Protecting Metal Surfaces From Corrosion: The Role of High Performance Coatings.....	I-3
Module Two: The Roles of Quality Assurance (QA) and Quality Control (QC) Inspectors on a Coatings Project	I-4
Module Three: Surface Preparation	I-4
Module Four: Practical Arithmetic for the Coatings Inspector.....	I-6
Module Five: Coating Mixing, Thinning, and Application	I-6
Module Six: Industrial Protective Coatings and Coating Systems	I-8
Module Seven: Specialty Inspection Projects.....	I-8
Module Eight: Coating Failures and Methods of Prevention	I-9
Module Nine: Inspector Safety	I-9
Module Ten: Coatings Specifications	I-9
Module Eleven: Pre-construction Conference and Inspection Procedure Development.....	I-10
Module Twelve: Project Inspection Workshop.....	I-10
Module Thirteen: International Maritime Organization (IMO).....	I-11
SSPC Protective Coatings Inspector Training and Certification Program.....	I-11
Use of Materials and Textbooks.....	I-13
An Orientation to the Coatings Industry and Key Organizations	I-13
Learning Outcomes.....	I-14

Module 1: Protecting Metal Surfaces From Corrosion: The Role of High Performance Coatings

Corrosion Defined.....	1-1
The Role of Protective Coatings in Preventing/Slowing Corrosion	1-2

The Fundamentals of Corrosion.....	1-2
Energy Required to Convert Ores into Metals.....	1-4
Dissimilar Metals.....	1-5
Corrosion Versus Oxidation.....	1-6
What is Steel?.....	1-6
Weathering Steel.....	1-7
How Coatings Protect the Substrate from Corrosion.....	1-7
Additional Cathodic Protection.....	1-8
Summary.....	1-12

Module 2a: The Roles of QA and QC Inspection Personnel on a Coatings Project

Quality Assurance vs. Quality Control.....	2a-1
Pre-construction (Pre-job) Conference.....	2a-7
Development of an Inspection Procedure (Plan).....	2a-9

Module 2b: Ethics (U.S. only)

Ethics.....	2b-1
-------------	------

Module 3: Surface Preparation: Methods, Industry Standards and Inspection

Introduction.....	3-1
Module 3 Learning Outcomes.....	3-2
Overview.....	3-2
The Inspector’s Role.....	3-3
Purpose of Surface Preparation.....	3-3
Inspection of Surface Preparation.....	3-3
Review of Industry Standards.....	3-4
Pre-surface Preparation Inspection.....	3-7
Preparation of Welds in Tanks and Vessels for Immersion Service.....	3-8
Testing for Chemical Contamination.....	3-16
How Do I Test for Soluble Salt Contamination?.....	3-17
How Do I Test for Specific Ions and Conductivity?.....	3-17
Selecting a Field Sampling and Testing Method.....	3-18

Methods of Sample Collection

Surface Sampling Method A: Surface Swabbing (Swab SCAT Kit)	3-20
Surface Sampling Method B: Latex Sleeve (Chlor*Test™ SCAT Kit)	3-20
Surface Sampling Method C: Latex Cell (Bresle Patch™ and BresleSampler®)	3-20

Methods of Sample Testing

Converting Between Surface Conductivity and Surface Concentration.....	3-21
Analyzing Surface Extractions for the Sulfate Ion.....	3-24
Measuring Ambient Conditions	3-23
Using Electronic Psychrometers to Measure Ambient Conditions.....	3-24
Using Surface Temperature Measuring Instruments.....	3-26
Calibrating Instruments for Measuring Ambient Conditions and Surface Temperature	3-27
Documenting Ambient Conditions and Surface Temperature	3-27
Dehumidification.....	3-28
Assessing Lighting and Surface Cleanliness	3-31
Methods of Surface Preparation.....	3-33
Selecting a Visual Standard.....	3-39
Using SSPC-VIS 3, “Guide and Reference Photographs for Steel Surfaces Prepared by Power and Hand Tool Cleaning”	3-41
Using SSPC-VIS 1, “Guide and Reference Photographs for Steel Surfaces Prepared by Dry Abrasive Blast Cleaning”	3-59
Using SSPC-VIS 5/NACE VIS 9, “Guide and Reference Photographs for Steel Surfaces Prepared by Wet Abrasive Blast Cleaning”	3-68
Conducting a Compressed Air Cleanliness (Blotter) Test	3-76
Abrasives.....	3-78
Abrasive Cleanliness.....	3-82
Measuring Surface Profile Depth.....	3-83
Using the Surface Profile Comparator	3-85
Using the Surface Profile Depth Gage	3-85
Using Replica Tape	3-85
Calibrating Surface Profile Measuring Instruments.....	3-86
Documenting Surface Profile Measurements	3-87
Using Portable Stylus Instruments for Determining Peak Density.....	3-87
Waterjetting.....	3-89
SSPC/NACE Joint Surface Preparation Standards Waterjetting of Metals	3-90

Using SSPC-VIS 4 /NACE VIS 7, “Guide and Reference Photographs for Steel Surfaces Prepared by Waterjetting”	3-92
Chemical Stripping	3-99
Inspection of Surfaces for Primer Application.....	3-100
Summary	3-102

Instrument Use Supplement.....3-137

Using Psychrometers to Measure Ambient Conditions	1-2
Using Electronic Psychrometers to Assess Ambient Conditions and Surface Temperature	1-8
Using Surface Temperature Measuring Instruments.....	1-17
Calibrating Instruments for Measuring Ambient Conditions and Surface Temperature	1-19
Documenting Ambient Conditions and Surface Temperature	1-20
Using the Keane-Tator Surface Profile Comparator	2-2
Using Digital Surface Profile Gages	2-5
Using Replica Tape	2-10
Calibrating Surface Profile Measuring Instruments.....	2-14
Documenting Surface Profile Measurements.....	2-15
How to Test for Soluble Salt Contamination	4-2
How to Test for Specific Ions and Conductivity	4-3
Selecting a Field Sampling and Testing Method	4-4
Collecting a Sample	4-6
Surface Sampling Method B.....	4-10
Surface Sampling Method C	4-12
Testing the Collected Samples	4-18
Sample Testing Method 5: Conductivity	4-31
Combination Extraction and Analysis	4-35

Module 4: Practical Arithmetic for the Protective Coatings Inspector

Learning Outcome	4-1
Introduction.....	4-2
Averaging a Set of Values	4-2
Converting Percentages to Decimal Format	4-4
Calculating Area.....	4-5
Converting Volatile Organic Compound (VOC) Content Values	4-17
Converting Temperature	4-18
Converting Units Used to Express Coating Thickness and Surface Profile Depth.....	4-19

Calculating Wet Film Thickness	4-20
Calculating the Target Wet Film Thickness	4-20
Calculating Coating Coverage Rates and Estimating Material Quantities	4-26
Summary	4-31

Module 5: Coating Mixing, Thinning and Application: Equipment Overview and Inspection Techniques

Introduction.....	5-1
Learning Outcomes.....	5-2
The Inspector’s Role	5-2
Review of SSPC Standards for Coating Application.....	5-3
Coating Manufacturer’s Technical Data Bulletins/Product Data Sheets	5-4
Material Receipt Inspection and Storage Conditions.....	5-14
Inspection of Mixing, Thinning and Application of Coatings	5-16
Measuring Coating Temperature.....	5-19
Documentation and Reporting Procedures Relating to Inspection of Coating Mixing	5-20
Coating Mixing Procedures	5-20
Coating Thinning Procedures.....	5-24
Inspecting Thinning Procedures.....	5-27
Documentation and Reporting Procedures Relating to Inspection of Thinning (reducing)	5-28
Coating Application Methods	5-28
Spray Technique.....	5-35
Calculating Wet Film Thickness	5-37
Calculating the Target Wet Film Thickness	5-38
Measuring Wet Film Thickness	5-43
Measuring Dry Film Thickness.....	5-44
Measuring the Thickness of Individual Layers Using Destructive Means	5-51
Documentation Procedures Relating to Inspection of Dry Film Thickness.....	5-53
Assessing Intercoat Cleanliness.....	5-54
Detecting Amine Exudate (Blush) on Polyamide and Polyamide-Cured Surfaces	5-54
Documentation Procedures Relating to Verification of Intercoat Cleanliness and Conformance to Recoat Intervals	5-55
Assessing Coating Cure	5-55
Assessing Coating Film Hardness	5-57
Measuring Adhesion	5-60
Detecting Pinholes and Holidays	5-63

Verifying the Accuracy of High Voltage Holiday Detectors.....	5-65
Inspecting Fluorescent Coating Systems	5-66
Summary.....	5-68

Instrument Use Supplement.....5-101

Calculating Target Wet Film Thickness	5-2
Measuring Wet Film Thickness	5-5
Adjusting and Using the Elcometer®456 wht PINIP™ Probe.....	6-23
Adjusting and Using the Fischer Dualscope® MPOR.....	6-27
What is a Tooke Gage?	8-1
Measuring Adhesion by the Knife Test (ASTM D6677)	9-11
Measuring Pull-Off Adhesion (ASTM D4541; ASTM D7234)	9-13
Measuring Adhesion Using the Elcometer® Model 106.....	9-15
Measuring Adhesion Using the HATE® Adhesion Tester.....	9-22
Measuring Adhesion Using the PATTI® Quantum Series Analog Adhesion Tester	9-28
Measuring Adhesion Using the PosiTest® AT Adhesion Tester.....	9-38
Special Requirements for Tensile Adhesion Testing of Coatings on Concrete.....	9-45
Tensile Adhesion Testing: Record the Type and Location of Break.....	9-47
What are Pinholes and Holidays?	10-1
Selecting a Holiday Detector	10-2
Using a Low-Voltage (Wet Sponge) Holiday Detector.....	10-3
Using a High-Voltage (Spark) Holiday Detector	10-6
Verifying the Accuracy of High-Voltage Holiday Detectors	10-11

Module 6: Industrial and Marine Protective Coatings and Coating Systems

Introduction.....	6-1
Industrial and Marine Protective Coatings Versus Paint.....	6-3
Industrial/Marine Coatings: Components.....	6-3
Curing Mechanisms	6-8
Identifying the Service Environment.....	6-10
Characteristics by Coating/Lining Type	6-11
Key Inspection Concerns by Coating/Lining Type.....	6-14
Coating Systems Defined.....	6-16
Coating System Selection	6-17

Performance Evaluation of Protective Coating Systems	6-28
Summary	6-30

Module 7: Specialty Inspection Projects

Introduction.....	7-1
Coatings Inspection in the Steel Fabrication Shop	7-3
Inspection of Thermal (Metallized) Spray Coatings (TSC).....	7-6
Measuring the Thickness of Thermal Spray Coatings	7-8
Inspection of Powder Coatings	7-9
Inspection of Galvanized Systems	7-11
Inspecting Overcoating Projects	7-13
Inspecting on Projects Involving Removal of Toxic Metal Coatings	7-18
Summary	7-25

Module 8: Coating Failures: Consequences and Case Studies

Introduction.....	8-1
The Role of the Coatings Inspector in Failure Avoidance	8-3
The Role of the Coatings Inspector in a Failure Investigation	8-3
Case Studies of Coating Failure.....	8-4
Summary	8-17

Module 9: Coatings Inspector Safety

Introduction.....	9-1
General Safety Responsibilities of the Coatings Inspector.....	9-2
Inspector Medical Surveillance.....	9-3
Safety Monitoring	9-3
Risks.....	9-4
Types of Hazards.....	9-5
Other Hazardous Materials Encountered by Inspectors.....	9-9
Hazardous Environments	9-10
Personal Protective Equipment	9-15
Summary	9-18

Module 10: Navigating Coating Specifications

Introduction.....	10-1
Learning Outcomes.....	10-1
Purpose of a Coatings Specification	10-2
Inspecting Against a Poorly Prepared Specification.....	10-4
Inspecting When There is No Specification.....	10-4
Specifying Coating Systems	10-5
Components of a Coating Specification.....	10-8
Summary.....	10-12

Module 11: Specification Review and Pre-Construction Conference; Inspection Plan Development for the Inspection of a “Bottomless” Tank Lining Installation

Introduction.....	11-1
Learning Outcomes.....	11-1

Module 12: Simulated QA/QC Inspection of “Bottomless” Tank Lining Installation

Introduction.....	12-1
Learning Outcome	12-1
Workshop Instruction.....	12-1

Module 13: IMO Requirements

Introduction.....	13-1
Learning Outcome	13-2
Purpose of Standard [Paragraph 1]	13-2
Definitions [Paragraph 2].....	13-3
General Principles [Paragraph 3.1-3.333].....	13-3
Coating Technical File [Paragraph 3.4]	13-3
Coating Standard [Paragraph 4.1-4.3]	13-5
Basic Coating Requirements [Paragraph 4.4].....	13-5
Coating Inspection Requirements [Paragraph 6].....	13-7

Appendix A: Comparison of SSPC and ISO Surface Preparation Standards for Power- and Hand-Tool Cleaned Steel and Blast Cleaned Steel
